

Hinge 356

Patented **double sprung hinge for FLAP DOOR**

Designed to maintain the shutter in the opening position without collapsing!

Suitable for furniture cupboards with frame thickness of 16 mm and 18 mm when the hinge bolster on the furniture is in a vertical position towards the shutter.

One of the fixing plates of the hinge has been overturned to keep the fixing point nearer to the edge of the door.

In addition to the coil spring the system makes use of a double leg spring, assuring 80.000 opening and closing cycles of the hinge and maintaining the horizontal position of the shutter without any collapse (90° opening angle)

Shutter dimension- 50 x 40 cm

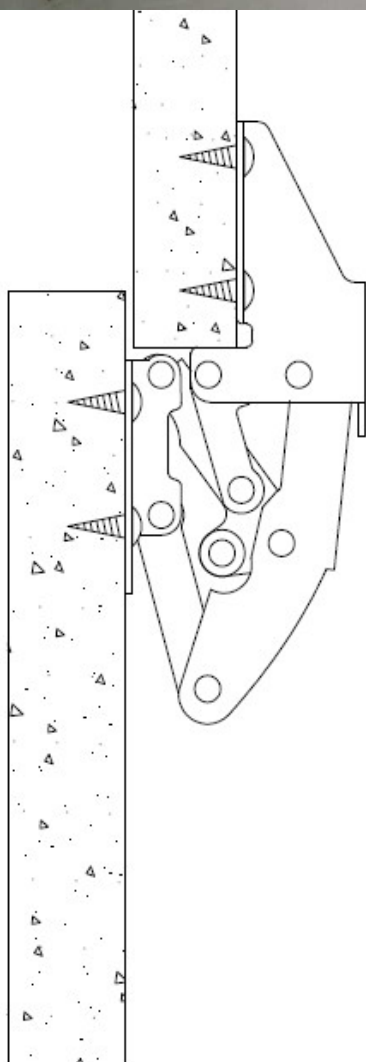

Shutter weight 1,40 kgs

recommended the use of 2 double sprung hinges

Shutter dimension- 70 x 40 cm

Shutter weight 2,00 kgs

recommended the use of 3 double sprung hinges
